RESONATE aims to generate the needed knowledge and practices for making European forests, the services they provide, and the related economic activities more resilient to future climate change, societal demands, and disturbances.

PROJECT SCOPE

- 48 Months (started in April 2021)
- 20 Partners from 12 different countries in Europe
- 9 Case studies all over Europe
- 1 European scale data analysis and modelling

WOOD VALUE CHAIN

- Forest ecosystem services
- Natural regeneration/tree nursery

FORREST MANAGEMENT

- Carbon storage
- Non-wood products
- Timber production
- Transport
- Recycling

SECONDARY PRODUCTS

- Thermal power plant
- Processing
- Consumption

PRIMARY PRODUCTS

- Transport
- Non-wood products
- Wood

TRADE/EXPORT

- Wooden logs
- Trade/Export

Case Study

- Finland
- Czech Republic
- Galicia/Portugal

This project has received funding from the European Union’s Horizon 2020 Research and Innovation Program under Grant Agreement 101000574.
